

# ALA AISSA

## IT ENGINEERING STUDENT

### CONTACT

+216 52722130  
aissaala52@gmail.com  
@Ala\_Aissa  
RAOUED , ARIANA , TUNISIE

### SKILLS

#### Programming Languages

Python , C , C# , Java

#### Framework

Springboot , Dotnet , expressjs Angular,  
Laravel , Nestjs,Django

#### Data Engineering

Azure , Airflow , Kafka , Excel,  
PowerBi , TableauPublic , ssms

#### DBMS

MongoDb, MYSQL , SQL,SPARQL

#### Devops

CI/CD practices , Git , Docker,  
Sonar , Nexus , Grafana , cloud  
services

### EDUCATION

- MS in Computer Science:** 2020-2025  
Location : The Private Higher School of  
Engineering and Technology  
ESPRIT

### CERTIFICATION

#### **DAR Blockchain**

- Hedera Certification

#### **Nvidia**

- Application of AI for Anomaly  
Detection

### LANGUAGES

|         |        |
|---------|--------|
| Arabic  | Native |
| French  | B2     |
| English | B2     |

### INTERESTS

- Cinema | Acting | Football | Geography |  
Politics

### PROFILE

Fifth-year engineering student with a strong passion for cloud data technologies and DevOps practices, I am seeking an end-of-studies internship (PFE) where I can apply my expertise in developing and managing distributed systems. Eager to contribute to innovative projects in Cloud Data Engineering or DevOps automation, I am driven to learn, adapt, and make a meaningful impact in a fast-paced, forward-thinking environment.

### WORK EXPERIENCE

#### **Summer internship : Esprit**

JULY 2023

- Mission :adapt the dynamic range of an image so that it can be correctly displayed on display devices limited in terms of light and dark tone rendering capabilities
- Technologies : Python

#### **Summer internship : Express Print**

JULY-AUGUST 2024

- Mission : Developing an innovative web application and mobile application for job seekers that streamlines the application process, enabling candidates to submit applications and receive feedback from administrators, while tracking employee performance on various tasks.
- Technologies : Springboot , Angular , MYSQL , FIREBASE , FLUTTER

### ACADEMIC PROJECTS

#### **HR Management App:**

- Manages the company's business environment to support seamless employee allocation.
- Tracks employee availability, skills, and assignments for optimal utilization.
- Includes tools for collaboration and communication between companies.
- Provides analytics and reporting for outsourcing performance and efficiency.

#### **Devops:**

- Developed and implemented a comprehensive DevOps pipeline for a backend Spring Boot project
- Automated the build, test, and deployment processes.
- Leveraged CI/CD tools to ensure efficient and reliable delivery
- Optimized workflow efficiency and enhanced code quality through automated testing and monitoring.

#### **Recycling App:**

- A web application allowing users to locate recycling centers.
- Provides resources to learn best practices for reducing waste.
- Enables users to organize community waste collection events.
